

March 12, 2014

Montgomery County Commission
Attn: Fred Brown, Chairman
P.O. Box 446
Independence, KS 67301

Dear Mr. Brown:

The City Commission at their regular meeting on March 11, 2014 considered the current 911 Consolidation issue now in consideration by the 911 Committee. The Commission directed City Staff to continue our participation on the Committee. Further, they directed me to write this letter informing the County Commission that they are very interested in investigating any opportunities that will provide our citizens the best service in the most efficient way. In order to determine this they recommend an independent study by a qualified consultant that will determine the best 911 delivery system available for a reasonable cost. The City Commission also agreed that the City would pay their reasonable share of the cost for this study with the other interested parties.

I would appreciate hearing from you as soon as it is convenient for the Board. The City Commission looks forward to working together to deliver this important service to our citizenry in the most responsible method that can be developed.

On behalf of the City Commission, I thank you in advance for your prompt attention to this matter.

Sincerely,

Micky Webb
City Manager
